

# IMAGE DRIVE / REFLECTION DRIVE AREA ROAD RECONSTRUCTION

The Municipality of Anchorage (MOA) is planning to upgrade the Image/Reflection Drive area (see map on back). Improvements are expected to include:

- New road foundation
- New storm drain system
- Improved street lighting
- New asphalt pavement
- Improved pedestrian facilities
- New stormwater lift station

The MOA has contracted with CRW Engineering Group, LLC to provide engineering and design services. No funding for construction has been received at this time. We are beginning the 65% design and it is estimated to be complete by June. An open house will be held after the 65% design is complete to review with the public. The next open house is tentatively scheduled for early fall 2019.

**In March, additional geotechnical field work is scheduled at the north intersection of Reflection Drive and Image Drive to gather information for the design of the new stormwater lift station. Crews will be drilling within the public right-of-way to collect soil and groundwater data. Also in March, AWWU crews and survey crews will be marking and locating water mains within the project limits with paint. Expect to see geotechnical, survey, and AWWU crews in your neighborhood to complete the work.**

*Thank you in advance for your patience, and please use caution when driving near the geotechnical, survey and AWWU crews!*

For more information and to sign up for e-mail updates, please visit the web page or contact:

## How to get involved:

- Attend the University Area Community Council Meeting: The project team will present updates at a few council meetings as the project advances.
- Attend a public open house: Two meetings are planned during the design phase.
- Visit the project website for meeting schedules, project documents, and to sign up for e-mail updates.
