

IMAGE DRIVE / REFLECTION DRIVE AREA ROAD RECONSTRUCTION

SURVEYORS WILL BE IN THE AREA!

Beginning in June, surveyors will be in the project area locating property corners at the front of your property. Property corners need to be located to accurately define where your property ends and the Municipality of Anchorage (MOA) right-of-way begins. The property corners in your neighborhood are typically buried below several inches of grass and topsoil. In order to locate the property corners, surveyors will need to remove and replace a small hole of grass/topsoil. Care will be taken to minimize damage to lawns and landscaping. Property corners located under pavement and driveways will not be located.

*Thank you in advance for your patience,
and please use caution when driving near the survey crews!*

How to get involved:

- Attend the University Area Community Council Meeting: The project team will present updates at a few council meetings as the project advances.
- Attend a public open house: Two meetings are planned during the design phase.
- Visit the project website for meeting schedules, project documents, and to sign up for e-mail updates.
